DISTINCTIVE LIGHTS ADD TO ITS DYNAMISM

F-PACE's new slimmer double 'J' graphic, Premium LED headlights with signature DRL have been designed to enhance the car's dynamic, purposeful look. Added to which, you'll see that the laser-etched monogram detailing - unique to Jaguar - is just one of many lovely touches that elevate the car's looks even further.

A SPORTY SUV FOR THE PRACTICAL YOU

Sporty. Eye-catching. Capable of carrying everything you want to take. In F-PACE there's space for five adults to sit comfortably, with plenty of head and leg room. Plus, a new 40:20:40 seating configuration means each of the seats can be folded completely or individually, to accommodate both passengers and bulky items. In fact, with all the rear seats folded, F-PACE's total loadspace capacity comes to a very impressive 1,842 litres*.

PLUG-IN HYBRID: AN ECO-THRILLING DRIVE.

Under the bonnet of the F-PACE Plug-in Hybrid is the P400e powertrain consisting of a 2.0 litre, 4-cylinder Petrol engine and a high-capacity 105kW electric motor. This can supply power in parallel with the engine or drive the vehicle in Electric Vehicle (EV) Mode. The 13.6kWh battery delivers an all-electric range of up to 33miles¹ from a full charge, which is capable of managing most urban commutes or day-to-day trips, and can be recharged in one hour forty minutes².

¹WLTP is the new official EU test used to calculate standardised fuel consumption and CO₂ figures for passenger cars. It measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding test procedure and driving profile. Figures are shown as a range under WLTP testing measures. The lowest figures refer to the most economical/lightest set of options. The highest figures refer to the least economical/heaviest set of options. WLTP legislation dictates that where there is <5g CO₂ variance between the lowest and highest figures, only the highest is declared. ²80% charge with a dedicated wall box. WHAT'S THE USE OF WINDING ROADS IF YOU CAN'T ENJOY THEM?

F-PACE's Adaptive Dynamics* works with Configurable Dynamics*, so that you can shift from one driving style and one set of road conditions to another. It does this by constantly monitoring your wheel position and body movements, as well as analysing acceleration, steering, throttle and brake movements before automatically adjusting the suspension. JaguarDrive Control with Adaptive Surface Response also detects rough road and off-road conditions, and adjusts the suspension settings accordingly for a more comfortable ride.

When straight roads become snaking roads, F-PACE's Torque Vectoring by Braking makes all the difference. It provides controlled independent braking on the inside front and rear wheels to maximise capability through even the tightest corners. Together with Dynamic Stability Control, it corrects understeer, giving the vehicle its sports car-like agility and providing you with extra confidence when driving.

ALL-WHEEL, ALL-WEATHER.

F-PACE's All Wheel Drive (AWD) system combines the agility and character of Rear Wheel Drive (RWD) with the added security and traction of AWD. In normal driving conditions, F-PACE is predominantly RWD for better handling and balance. But when roads or conditions become more challenging, the system subtly channels power for optimum traction and more comfortable progress. This is when Jaguar's Intelligent Driveline Dynamics kicks in, using sensors measuring throttle and steering inputs to anticipate wheel slip. Intelligent Driveline Display seamlessly co-ordinates these inputs, and compares them with responses from the engine, transmission and traction control systems to calculate the traction available and distribute torque accordingly, even before grip is lost.

*Weights reflect vehicles to standard specifications. Optional extras increase weight. **Includes a 75kg driver, full fluids and 90% fuel. †Includes full fluids and 90% fuel. ††WLTP is the new official EU test used to calculate standardised fuel consumption and CO₂ figures for passenger cars. It measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding test procedure and driving profile. Figures are shown as a range under WLTP testing measures. The lowest figures refer to the most economical/lightest set of options. The highest figures refer to the least economical/heaviest set of options. WLTP legislation dictates that where there is <5g CO₂ variance between the lowest and highest figures, only the highest is declared.

*Dry: Volume as measured with VDA-compliant solid blocks (200mm x 50mm x 100mm). **Wet: Volume as measured by simulating the loadspace filled with liquid. Volume measured up to the headliner. Boot configuration and total loadspace will vary by vehicle specification (model and powertrain) and market, and if full size spare or space saver spare wheel is fitted.

Dimensions were measured with vehicle at unladen weight.
